Charles Wm
Acting 1st Lt. 1st Regt. 1st Div.

Remarks made by the Deputy Commr
of Shavari on the Administration report
of Mr. C. Wiltshire Agst Assistant Commr
Shavari, for the year 1879-80. —

I have the honor in forwarding
Mr. Wiltshire's administration report, to
draw attention to the fact mentioned
in paras 9 & 9A, that out of nine lakh
nine hundred and fifty-six Rupees, the
Land Revenue demands in his three
Talukas, the balance outstanding
now is only Rs 525. This shows that
the collections have been realized
with more punctuality this year.
The only outstanding balances are now
for the famine years, viz. - 1876-77 & 1877;
Government sanction is being asked to
write off these sums as irrecoverable.
Para II — Mr. Wiltshire deserves praise
for the manner in which he travelled
in the rainy weather last year when

the collections have been realized
with more punctuality this year.
The only outstanding balances are now
for the famine years, viz. - 1876-77 & 1877-78
Government sanction is being asked to
write off these sums as irrecoverable
Para II - Mr. Wiltshire deserves praise
for the manner in which he travelled
in the rainy weather last year when
the

the roads were all heavy with black
mud & through out the whole of his tenure
It was difficult work to travel at that
season for the rats abounded most
where the black soil was plentiful.
I have no doubt that the exertions
of the Assistant Collectors and their un-
wonted presence in the midst at that
inclement season made the talukha
and village officers realize, more than
any amount of mere orders would have
done, what weight Government attaches
to the enforcing of personal responsi-
bility of all officials, whose duty
it was to arouse the people generally
to earn the Govt. rewards by ex-
terminating the rats which were
devouring their seed as fast as down.
Para — Mr. Wiltshire noticed what
has been before remarked on how the
rain last monsoon favoured the
spring or rabi crops rather than

~~Autumn~~

Para II — I conclude from what
Mr. Wille has says in this para that
the famine, the loss of crops by rot
and the increase of assessment since
the revision settlement are the causes
which account for the 1822 acres of
land being thrown out of cultivation this
year in his 3 talukas, thus making the
total extent of arable land now un-
cultivated 5742 acres in all. It is
just possible the rise in the assess-
ment at the revision settlement is one
reason for this, for Dhawan was the
last revised of the three talukas he
reported on, and the land thrown up as
lying waste there, is far more than
in the two other talukas. The increase
of Land Revenue by the revision set-
tlement is however only legitimate, when
the rise in prices and the improvements
in the means of communication are

to earn the Govt. rewards by ex-
terminating the rats which were
devouring their seed as fast as sown.
Para — Mr. Wiltshire noticed what
has been before remarked on how the
rain last monsoon favoured the
spring or rabi crops rather than
autumn.

~~unimproved~~

Para II — I conclude from what
St. Willelme says in this para that
the famine, the loss of crops by rats,
and the increase of assessment since
the revision settlement, are the causes
which account for the 1522 acres of
land being thrown out of cultivation this
year in his 3 talukas, thus making the
total extent of arable land now un-
cultivated 5742 acres in all. It is
just possible the rise in the assess-
ment at the revision settlement is one
reason for this, for Dhawan was the
last revision of the three talukas he
reported on, and the land thrown up as
lying waste there, is far more than
in the two other talukas. The increase
of Land Revenue by the revision settle-
ment is however only legitimate, when
the rise in prices and the improvements
in the means of communication are
considered.

the roads were all heavy with black
mud through out the whole of his talukas
It was difficult work to travel at that
season for the rats abounded most
where the black soil was plentiful.
I have no doubt that the exertions
of the Assistant Collector and their un-
wonted presence in the midst at that
inclement season made the talukas
and village officers realize, more than
any amount of mere orders would have
done, what weight Government attaches
to the enforcing of personal responsi-
bility of all officials, whose duty
it was to arouse the people generally
to earn the Govt. rewards by ex-
terminating the rats which were
devouring their seed as fast as sown.
Para — Mr. Wiltshire noticed what
has been before remarked on how the
rain last monsoon favoured the
spring or rabi crops rather than
autumn.

autumn ones.

Para II — I conclude from what
St. Willehise says in this para that
the famine, the loss of crops by rats
and the increase of assessment since
the revision settlement, are the causes
which accounts for the 1522 acres of
land being thrown out of cultivation this
year in his 3 talukas, thus making the
total extent of arable land now un-
cultivated 5742 acres in all. It is
just possible the rise in the assess-
ment at the revision settlement is one
reason for this, for Dhawan was the
last revised of the three talukas here
reported on, and the land thrown up and
lying waste there, is far more than
in the two other talukas. The increase
of Land Revenue by the revision settle-
ment is however only legitimate, when
the rise in prices and the improvement
in the means of communication are
considered

considered, still I can hardly believe that the selling value of land in Sharwar taluka since the revision of the assessment is now only four times that of the assessment. In fact I have ascertained by referring to the records of the Sub Registrar that the selling value of land is now on an average over eight times the assessment.

Para ~~IV~~ — Considering that Mr. Wiltshire was absent for two months — during the travelling season at Karwar partly on leave and partly on duty acting for the Nagar Deputy Collector the amount of his village inspection would appear to be satisfactory. The destruction of old records also has been properly attended to by him.

Para ~~V~~ — The License tax has been satisfactorily worked in the three talukas comprising Mr. Wiltshire's charge and the whole of the revenue

for collection has been realized by deducting the small sum of Rs 109 remitted on appeal.

Para ~~XXX~~ — It appears from the report that Ron and Shamra have benefitted most in roads and the Sawalgund taluka in water works. In Ron the roads to Sawalgund and as well as to Saday and ^{the} Badam frontier have cost a large sum & will cost much more before completed.

Para ~~XXXI~~ — Here Mr. Wiltshire describes the progress of roadside tree planting in his District. The number of trees planted in Ron and Sawalgund is still too few. The mango does not succeed well in those black soil talukas, but much may be accomplished in the way of sowing babul and neem trees, which are both hardy and very useful trees. It is expected that an improvement

considered, Still I can hardly believe that the selling value of land in Dharwar taluka since the revision of the assessment is now only four times that of the assessment. In fact I have ascertained by referring to the records of the Sub Registrar that the selling value of land is now on an average over eight times the assessment.

Para XIV — Considering that Mr. Wiltshire was absent for two months — during the travelling season at Karwar partly on leave and partly on duty acting for the Nagar Deputy Collector the amount of his village inspection would appear to be satisfactory. The destruction of old records also has been properly attended to by him.

Para XV — The License tax has been satisfactorily worked in the three talukas comprising Mr. Wiltshire's charge and the whole of the revenue for

for collection has been realized after deducting the small sum of Rs 1075 remitted on appeal.

Para ~~XXXII~~ — It appears from this para that Ron and Sharava have benefitted most in roads and the Nawalgund talukas in water works. In Ron the roads to Nawalgund and as well as to Saday and ^{the} Badami frontier have cost a large sum and will cost much more before completion.

Para ~~XXXIII~~ — Here Mr. Wiltshire describes the progress of roadside tree plantation in his District. The number of trees planted in Ron and Nawalgund is still too few. The mango does not succeed well in those black-soil talukas, but much may be and is going to be done in the way of sowing babul and neem trees, which are both hardy and very useful trees. It is expected that an improvement

considered, still I can hardly believe that the selling value of land in Sharwar taluka since the revision of the assessment is now only four times that of the assessment. In fact I have ascertained by referring to the records of the Sub Registrar that the selling value of land is now on an average over eight times the assessment.

Para ~~XX~~ — Considering that Mr. — Wiltshire was absent for two months — during the travelling season at Karwar partly on leave and partly on duty acting for the Nagar Deputy Collector the amount of his village inspection would appear to be satisfactory. The destruction of old records also has been properly attended to by him.

Para ~~XX~~ — The License tax has been satisfactorily worked in the three talukas comprising Mr. Wiltshire's charge and the whole of the revenue

Lm

for collection has been realized after deducting the small sum of Rs 1075 remitted on appeal.

Para ~~XXX~~ — It appears from this para that Ron and Sharav have benefitted most in roads and the Sawalgund taluka in water works. In Ron the roads to Sawalgund and as well as to Saday and ^{the} Badam frontier have cost a large sum and will cost much more before complete.

Para ~~XXX~~ — Here Mr. Wiltshire describes the progress of roadside tree plantation in his District. The number of trees planted in Ron and Sawalgund is still too few. The mango does not succeed well in those black soil talukas but much may be and is going to be done in the way of sowing babul and neem trees, which are both hardy and very useful trees. It is expected that an improvement,

prominent in this respect will appear in next year's report. The Honorable Mr. Willshire's plan of first planting in flower pots in nurseries and of replanting on the roadside the following season could not be carried out in some talukas because the haidatbars in many instances had sown mango and jack trees, which are not hardy enough to plant out the year after sowing and leave ^{live} without any other than rain water. This inattention to orders has occasioned the keeping plants in nurseries for more than one season. The number of plants, 1450, said to be planted this rains in the Ron Taluka on the road between Laday and Badami is at least a good beginning.

Para XXV - In the concluding words of this para Mr. Willshire refers to

a Provincial road for which a large sum of money was spent the famine time at Government expense in making a raised embankment with the view of eventually making a good Provincial road from Hubli via Navalgund to Sholapur. This line of road runs through a black soil country intersected by a nalla with a boggy bed called the Benni nalla or Butter nalla from its soft bed. The cost of completing this road is so great that it may be considered indefinitely postponed. A cheaper line would be via Solapur and Nargund to the border of the Kaladgi District as this has some gravel within a convenient distance and is not intersected by such a dangerously boggy nalla. The line of most of the roads in this District will

improvement in this respect will appear in next year's report. The Honorable Mr. Ashburner's plan of first planting in flower pots in nurseries and of replanting on the roadside the following season could not be carried out in some talukas because the hand-labourers in many instances had down mango and jack trees, which are not hardy enough to plant out the year after sowing and leave without any other than rain water. This inattention to orders has occasioned the keeping plants in nurseries for more than one season. The number of plants, 1450, said to be planted this rains in the Ron Taluka on the road between Laday and Badami is at least a good beginning.

Para XXV - In the concluding words of this para Mr. Wiltshire refers to

a Provincial road upon which a large sum of money was spent in the famine time at Government expense in making a raised embankment with the view of eventually making a good Provincial road from Hubli via Kavalgund to Sholapur. This line of road runs through a black soil country intersected by a nalla with a boggy bed called the Benni nalla or Butter nalla from its soft bed. The cost of completing this road is so great that it may be considered indefinitely postponed. A cheaper line would be via Solapur and Nargund to the border of the Kaladgi District as this has some gravel within a convenient distance and is not intersected by such a dangerous boggy nalla. The line of most of the roads in this District will

improvement in this respect will appear in next year's report. The Honorable Mr. Ashburner's plan of first planting in flower pots in nurseries and of replanting on the roadside the following season could not be carried out in some talukas because the mandolators in many instances had sown mango and jack trees, which are not hardy enough to plant out the year after sowing and leave without any other than rain water. This intention to order has occasioned the ripening plants in nurseries for more than one season. The number of plants, 1400, said to be planted this rains in the Ron Taluka on the road between Laday and Badami is at least a good beginning.

Para XXV - In the concluding words of this para Mr. Withshier refers to

a Provincial road upon which a large sum of money was spent in the famine time at Government expense in making a raised embankment with the view of eventually making a good Provincial road from Hubli via Nawalgund to Sholapur. This line of road runs through a black soil country intersected by a nalla with a boggy bed called the Benui nalla or Butter nalla from its soft bed.

The cost of completing this road is so great that it may be considered indefinitely postponed. A cheaper line would be via Solapur and Nargund to the border of the Jaladgi District as this has some gravel within a convenient distance and is not intersected by such a dangerous boggy nalla. The line of most of the roads in this district will

will however depend upon whether a Railway is made to Sasag or Nabli from Sholapur. It is much needed as well as the one to the coast and to Bellary when the communication by Railway in this District will be complete and Local and Provincial Funds will be limited to making feeders to this Railway.

Para ~~XXX~~ - It is satisfactory to see an increase of — 1075 in the number of persons vaccinated during the year in the acting 1st Assistant Collector's District.

Para ~~XXX~~ - The increase in the number of cattle, ploughs, houses, and Carts shown in this para is satisfactory as showing that the condition of the people is improving.

Para ~~XXX~~ - As only two heads are here given of mortality, it perhaps follows

that all deaths not resulting from cholera are put down to fever. Fever is prevalent in the hills especially in the drier Districts such as a portion of the Dharmapuri taluk. But still so great a mortality as is here described is most likely due to the fact that in this country all sorts of illness, such as cough, cold, and intestinal complaints, such as worms, are called fever by the natives.

Para ~~XXXX~~ — This notice of what new school-houses are required shall be brought to the knowledge of the Educational Inspector. ~~that~~ ^{the} has proposed to place the administration of the schools under the collector and his assistants immediate supervision. The Educational Inspector is ably assisted by his

S. S. S.

will however depend upon whether a Railway is made to Gadag or Habbli from Sholapur. It is much needed as well as the one to the coast and to Bellary when the communication by Railway in this District will be complete and Local and Provincial Funds will be limited to making feeders to this Railway.

Para ~~XXX~~ - It is satisfactory to see an increase of — 1075 in the number of persons vaccinated during the year in the acting 1st Assistant Collector's District.

Para ~~XXX~~ - The increase in the number of cattle, ploughs, houses, and carts shown in this para is satisfactory as showing that the condition of the people is improving.

Para ~~XXX~~ - As only two heads are here given of mortality, it perhaps follows
th. - t.

that all deaths not resulting from Cholera are put down to fever. Fever is prevalent in the Gidra especially in the duffer Districts near Kanara, such as a portion of the Dharwar taluk. But still so great a mortality as is here described is most likely due to the fact that in this country all sorts of illness, such as cough, cold, and intestinal complaints, such as worms, are called fever by the natives.

Para ~~XXXX~~ — This notice of what new school-houses are required shall be brought to the knowledge of the Educational Inspector. That ~~Off~~ has proposed to place the Administration of the Schools under the Collector and his Assistant's immediate supervision. The Educational Inspector is ably assisted by his
Subordinate

Deputy Mr. Chambers and suggestions from the Collector or his Assistants are at once acted on while the Revenue Officers on the other hand give the Educational Department all the support they can, especially in requiring village officers to exert their influence with parents to prevent the attendance in schools from falling off. It ^{seems} is, therefore, of little importance whether the primary School masters are or are not a body placed under the Collector or not.

5. A comparison with the Settlement of last year reported in my letter No. 413 of 14th July 1879. gives a net increase of Rupees 39714-10 5 as shown in the following table:-

Talukas.	More.			Less			Net.		
Rambinnur	823	10	"	8754	"	4	7930	6	4 Decrease
Hangal	13452	3	"	3217	11	5	10234	7	7 Increase
Kod	45182	10	5	7126	9	4	38056	1	4 Increase
Karajgi	3199	"	11	3844	9	1	645	8	2 Decrease
Total—	6265	8	7	22942	4	2	39714	10	5 Increase

The causes of this increase are given in detail in appendix II and may be said to be principally owing to the revision settlement in the talukas of Hangal and Kod and the cause of decrease in the talukas of Rambinnur and Karajgi is mainly due to cultivable lands being thrown up by the ryots.

6. 80 remissions have been granted.

this year.

7. No advances have been made during the year under report and none have been made last year there were no items for recovery. (Appendix IV.).

The Abkari revenue of these districts is managed on the farming system and although the cocoanut palm is extensively grown in gardens the wild date alone is tapped for toddy and the contracts both for country spirits and toddy are sold in public auction for the whole of each taluka in the time to the highest bidder. The revenue obtained for these farms at the public auctions so held is shown below.

Talukas	Spirits		Toddies		Total	
	No. of	Amount	No. of	Amount	Total	
Manjeri	9	6500	"	"	9	6500
Manjeri	10	11005	"	"	10	11005
Manjeri	5	5025	2	"	10	5025
Manjeri	4	5000	"	"	"	5000
Total	28	28005	2	"	30	28005

of last year reported in my letter No. 413 of
14th July 1879. gives a net increase of Rupee
39714-10-5 as shown in the following table:-

Talukas.	More.			Less.			Net.			
Ranebinnur	823	10	-	8754	-	4	7930	6	4	Decrease
Hangal	13482	3	-	3217	11	5	10234	7	7	Increase
Kod.	45182	10	8	7126	9	4	38056	1	4	Increase
Karajgi.	3199	-	11	3844	9	1	645	8	2	Decrease
Total—	62657	8	7	22942	14	2	39714	10	5	Increase

The causes of this increase are given in detail
in appendix II and may be said to be principally owing to the revision settlement in the
talukas of Hangal and Kod and the cause
of decrease in the talukas of Ranebinnur
and Karajgi is mainly due to culturable
lands being thrown up by the ryots.

6. No remissions have been granted—

This year.

7. No advances have been made during the year under report and none has been made last year there were no means for recovery. (Appendix IV).

8. The Abkari revenue of these streets is managed on the farming system although the cocoanut palm is extensively in gardens the wild date alone is tapped for toddy and the contracts both for country spirit and toddy are sold by public auction for whole of each taluka in the lump to the highest bidder. The revenue obtained for these fares at the public auctions so held is shown below.

Talukas.	Spirit.		Toddy.		Total.	
	Shops.	Amount.	Shops.	Amount.	Shops.	Amount.
Rauebinur	9	6500	"	"	9	6500
Hanagal	10	11075	"	"	10	11075.
Kod	8	5025	2	"	10	5025.
Karajji	14	6005.	"	"	14	6005.
Total.	41	28605.	2	"	43	28605.

As compared with the last year's figures the revenue obtained shows a considerable increase amounting to Rupees 4205. The

increase

11.

The following table shows the amounts realized by the sale of Ganjap Bhag contracts during the year under notice.

Talukas.	Amount.		
Ranabumut	100	-	-

The figures given above show that the Outstanding balances in the Karajgi and Hangal Talukas are rather large in comparison with those of the other two Talukas - but these figures are principally due to the increased judi-
 Settlements are likely to be recovered. Every effort has been made to recover as much of the outstanding balances as possible and are still being continued. -

10. The season has on the whole been a favourable one in the districts coming under charge as although the rainfall was less than what it was last year (except that at Karajgi) it was more timely and consequently benefited the crops better. I notice with pleasure that the crops had not been so much injured as I feared last year from

Talukas.	Rainfall.	
	Average of five years.	Current year.
Ranabhim	24.82	23.59
Hangal	31.86	35.80
Kod	26.48	29.46
Karajgi	22.45	33.52

would have been, but this preservation of crops was due entirely to the destruction of rats under the orders of Government, to give effect to which I personally visited districts, and also experimented with the phosphorus balls supplied by Government.

The total number of rats killed amounted to 19,55,615 for which rewards were paid to the extent of Rupees 19,529-10-4. The Karaggi and Ranbennur Talukas were those chiefly affected by the incursions of these vermin. The Ranbennur Taluka was principally affected in its south-western part and the Karaggi taluk in its northern and eastern quarters. The Kod and Harsel talukas were very slightly infested. The former in the part which adjoins the Karaggi taluka and the latter in its northern and eastern quarters but the numbers killed in these two talukas were not great. In the Kod taluka the number

The figures given above show that the outstanding balances in the Rang and Rangal Talukas are rather large in comparison with those of the other two Talukas - but these figures are principally due to the increased judi. resulting from the recent revised Survey & Settlement & are likely to be recovered. Every effort has been made to recover as much of the outstanding balances as possible and are still being continued:-

16. The season has on the whole been a favourable one in the districts comprising my charge as although the rainfall was less than that it was last year (except that at Karajgi) it was more timely and consequently benefitted the crops better. I noticed with pleasure that the crops had not been so much injured as I feared last year they

Karajgi	22.40	33.54

would have been, but this preservation of crops was due entirely to the destruction of rats under the orders of Government, to give effect to which I personally visited districts, and also experimented with the phosphorus balls supplied by Government.

The total number of rats killed amounted to 19,55,615 for which rewards were paid to the extent of Rupees 19,529-10-4. The Karajgi and Ranebimmur Talukas were those chiefly affected by the incursions of these vermin. The Ranebimmur Taluka was principally affected in its South-western part and the Karajgi Taluka in its northern and eastern quarters. The Kood and Hangal talukas were very slightly infested. The former in the part which adjoins the Karajgi Taluka and the latter in its northern and eastern quarters but the numbers killed in these two talukas were not great. In the Kood Taluka the numbers

thousands and in the Hangal Taluka to a little less than eighteen (18) thousand. It will thus be seen that the parts principally affected were those where black soil abounds, and the slight injury done to the crops was chiefly in the northern and eastern portions of the Karajgi taluka. The return in my talukas was, under these circumstances, satisfactory, and the prices which have ruled throughout the year had fallen considerably from what they were last year.

I may here mention that no signs of distress from famine were at all perceptible among the people inhabiting these talukas and there was therefore no expenditure for the maintenance of people starving from want of food.

The general condition and prospects of my in a material point of view may be said, in the year under report, to be more favourable

Talukas.	Cultivation.				More.		Less.		Grass and still available.
	1878-79.		1879-80.						
Ran. binia	49739	39	110881	4	1108	11	9990	11	40879
Mangal	80994	23	80292	31	1096	2	1797	34	10116
Kod	126272	18	124460	30	3174	33	3986	21	23682
Karajgi	137677	35	133466	20	-	-	4211	15	22882
Total	463684	35	449071	5	5372	11	19986	1	97530

The extent of cultivated area, however, it will be seen, has much diminished, and that available for cultivation has consequently increased. The diminution in the cultivated area is chiefly due to the introduction of the Revision Settlement and to the impoverished condition of the peas caused by the famine, and the somewhat unfavourable seasons which followed it. As a necessary consequence, occupancies have not recovered their proper value, and it does not

led to a little more than seventy six (76) thousands and in the Nangal Taluka to a little less than eighteen (18) thousand. It will thus be seen that the parts principally affected were those where black soil abounds, and the slight injury done to the crops was chiefly in the northern and eastern portions of the Naranyi taluka. The culture in my talukas was under these circumstances, satisfactory, and the rains which have ruled throughout the year have been considerably from what they were last year.

I may here mention that no signs of distress from famine were at all perceptible among the people inhabiting these talukas and there was therefore no expenditure for the maintenance of people starving from want of food.

11 The general condition and prospects of my district in a material point of view may be said for the year under report, to be more favourable

than last year.

Talukas.	cultivation.				More.	Less.	Arable area			
	1878 79.		1879 80.				still available

Total	163684	35	144907	5	5372	11	19986	1	97530	17

The extent of cultivated area, however, it will be seen has much diminished and that available for cultivation has consequently increased. This diminution in the cultivated area is chiefly due to the introduction of the division settlement and to the overworked condition of the peasant and to the various and the somewhat unpropitious seasons which followed it. As a result some serious occurrences have not so far occurred and some value and it has not

favoured with at least a couple of years' fertility. The occupancies in the Ranbhim and the Karajgi Talukas have always commanded a higher value than those in the talukas of Kod and Hangel. II Revenue (b) Supervision

12. The comparisons of the Taluka Sale bands of the past year (1878-79) required by Government Resolution S^o 1454 of November

2^d 1869 were duly completed on the dates given in the margin and

in the manner pre-

scribed at page

13 of the Manual

Talukas.		
	Dates.	Dates.

The Huzar form No. III was duly compared with the day-book & other expansions at the time the rest of the accounts were inspected.

The "destruction" of useless village and taluka records has been carried out by me to the extent shown below:—

Taluka.	Village records.	Taluka records.
	up to	up to.
Ranebennur	1875 76	1876 77.
Hauzal	1875 76	1876 77.
Kod	1876 77.	1876 77.
Karajgi	1869 70	1876 77.

The amount of village inspection which has been performed personally by me is shown below:-

Talukas.	Villages.				Ryots receipt books examined.		Boundary books examined.	
	Total number	Number visited.	Nº in which accounts examined.	Nº in which receipts examined.	No. of villages.	Number of books.	No. of villages.	Number of fields.
Ranebennur	132	20	25	25	25	243	15	127.
Hangal	174	26	22	22	23	187	10	82.
Kod	189	20	37	37	28	252	7	53
Karajgi	136	20	33	33	19	204	13	101
Total	631	86	117	117	95	916	45	363.

The performance of their duties by village accountants is on the whole good. The number of kulkarnies and patels in each of these four talukas and the number fined in each for various degrees of negligence are given below:-

Talukas	Nº of Kul-karnies hereditary & stipendiary	Number fined.			Nº of Patels hereditary & stipendiary	No. fined.		
		Nº	Amount.			Nº	Amount.	
Ranebennur	90	10	18	6	126	1	1	21
Hangal	102	13	35		167	9	32	4
Kod	97	14	25	8	189	6	3	
Karajgi	101	12	40	5	134	20	57	11

The income tax has been discontinued

16. License Tax.— The workings of the License tax act in these talukas will be apparent from the figures given below. The number of appeals presented in the year under notice against the assessments fixed by the hamledars amounted to only 74, which shows a great diminution in numbers as compared with those of the last year, and of these, only 40 appellants attended at the time appointed for the hearing and disposal of appeals. From this and from insignificant remissions which it was found necessary to make, it will be seen that the work of assessment was satisfactorily performed by the hamledars. The amounts shown in column "Irrecoverable amounts" were remitted under orders from the Collector. As regards the items under the head of "Outstanding balances" further steps have to be taken to try and effect their recovery, as advised by the Collector.

The amount of village inspection which has been performed personally by me is shown below:—

Talukas.	Villages.				Ryots receipt books examined.		Boundary maps examined.	
	Total number.	Number visited.	No. in which accounts examined.	No. in which receipts examined.	In how many villages.	Number of books.	In how many villages.	Number of fields.

Karajji	11 1/2	3612	.	.	.	434	7	4
Total	74 3/4	14122.	24 1/2	600	569	2030	15	6

X 4000 seedlings are ready for plantation but as they have not yet been planted the figures have not been entered - Rs 650 - 00 -

Seedlings have been prepared in flower pots in all the four talukas to be planted this monsoon, according to the Honourable Mr. Hukibpur's plan. The young plants so prepared are in good condition.

26 No Imperial and Provincial works of any kind are in progress in the

Talukas

talukas. The Imperial road from Poona to
 Harihar passes through my Districts and
 has been repaired by the Public Works De-
 partment. The road side trees on this road are
 in my charge, and the amounts expended on
 them are specified in the following table.
 The trees are in good condition.

Talukas	class of works.	Amount.		
Eandibur	Preserving Road side trees	451	8	-
Nangal		-	-	-
Kod		-	-	-
Karajgi	Preserving Road side trees.	97	9	9
	Total	549.	1	9

27. The general progress of the works
 throughout my charge during the year under
 review has been satisfactory.

The buildings for the Dispensary of
 Haveri, for which the people have contributed
 Rs. 5353-8-0 are very much required, and

talukas. The Imperial road from Poona to
Nariman, passes through my Districts and
has been repaired by the Public Works Depa-
ment. The road side trees on this road are
in my charge, and the amounts expended on
them are specified in the following table.
The trees are in good condition.

Talukas	class of works.	Amount.		
Panabimur	Preserving Road side trees	451	8	-
Wangal		-	-	-
Kod-		-	-	-
Karaiji	Preserving Road side trees.	97	9	9
	Total-	549	1	9

17. The general progress of the works
throughout my charge during the year under
review has been satisfactory.

The buildings for the Dispensary of
Haveri for which the Government have contributed
Rs. 5353-0

it is hoped that their construction will be commenced next fair season. The accommodation at present available for the Dispensary and in-door patients is quite unfitted for the requirements of the Dispensary and no better accommodation can be had at Haveri. A suitable site has been selected and secured by me for the proposed Dispensary buildings, in constructing which I would suggest that the Medical Officer's quarters should be entirely separate from the Sick-wards and Dispensary rooms.

— VI. Municipalities. —

28. There are four Municipalities at present in my charge. Of these the Municipalities of Byadgi, Mangal and Haveri were established this year.

The income and expenditure of these Municipalities during the year under report.

Village	Name of owner	Income					Expenditure									
		Other	own cattle	graze	Rent	Other dues	Total	Food & clothing	Education	Prof. & literature	Miscellaneous	Total	Balance			
Thandimar	Ranobim	2664-4	2853-4	2032-0	.	355-8-9	7920-7	1488-6	.	.	996-7-6	2400-0	2664-4	2664-4	2664-4	2664-4
D. Gyalgi	.	.	3337	471-4	.	35-10-9	3869-2	606-3-6	.	.	288-4-4	949-2-3	2000-0	949-2-3	2000-0	2000-0
Hangal	Hangal	.	163-3	210-5	.	9-12-6	382-5-9	255-6-1	.	.	98-8-4	109-8-8	16-1-2	109-8-8	16-1-2	16-1-2
Kharajgi	Havari	.	1667-7	101-8	.	3-0-0	1771-9-8	673-6-6	.	.	225-1-1	60-6-8	740-3-9	60-6-8	740-3-9	740-3-9
Total	.	2664-4	5050-15-4	2021-18	.	406-5-0	13931-27	2812-23	.	.	1615-4-3	2400-0	2664-4	2664-4	2664-4	2664-4

it is hoped that their construction will be commenced next fair season. The accommodation at present available for the Dispensary and in-door patients is quite unfitted for the requirements of the Dispensary and no better accommodation can be had at Haveri. A suitable plot has been selected and secured by me for the proposed Dispensary buildings, in constructing which I would suggest that the Medical Officer's quarters should be entirely separate from the sick-wards and Dispensary rooms.

— VII Municipalities. —

28. There are four Municipalities at present in my charge. Of these the Municipalities of Byadgi, Mangal and Haveri were established this year.

The income and expenditure of these Municipalities during the year under report are

Village.	Name of town.	Income.					Expenditure.										Balance		
		Don Subsidy	Grass	Rents.	Other Taxes	Total.	Establishment.	Lighting.	Watering.	Grassway.	Grave.	P. Works, mns.	P. Works, Refuse.	Education.	Public Amusement.	Welfare.		Total.	
Carachimur	Ranching	2883-4-	2839-20		388-8-9	7920-7	408-4-6				996-76			238-4-0			564-10-9	5692-4-	2698-12-2
D. G. Gadgi		3339-	476-4-		35-14-9	3849-3-9	460-8-4				289-00						564-	9492-2-2	2000-5-4

T. Tew.		8050-18-4	2824-8-6		401-5--	1390-37	2812-33				465-4-3			248-			88-3-4	9233-6-7	1077-12-2

I am respectfully of opinion that
Municipality cannot well be maintained at-
ngal and on this subject I have addressed you
my letters noted in
margin in the last
which I have suggested

No 140 of the 19 th February 1880
No 402 of the 3 rd June 1880

it if it is deemed a sufficient object to keep
town clean, without under-taking any further
improvements, the House Tax, the tax upon snuff
and tobacco, and the cattle pound fees might
retained (the Octroi duty being given up),
and that a moderate establishment costing ^{nearly} ~~10000~~
all a sum of Rupees 528 per annum ^{double the present}
^{value in the 19th}
might be kept up to secure the proper sani-

tion of the town. A six months' experience has
shown that the collection of Octroi costs more than
income from that tax.

There is also a branch Muni-
cipality at Gudquddhar under the Municipality
Ranebennur, where an annual Jatra is held, &
Poll Tax is levied on visitors to provide for the

VII Public Health.

29 The extent of general conservancy in towns may be inferred from the expenditure shown in the last paragraph. The particulars of the Dispersary at Haveri, which is the only one in my district are given below:—

Taluka	Name of town.	Patients		Cost in 1879-80.			
		In	Out	Government	Local funds	Contributions	Total.
Karajgi - Haveri -		43	3935	3129-5 6	1241-3-10		4370-9-4.

Since my last report Assistant Surgeon, Mr. Vishwanath Apte, has been placed in charge of the Dispensary. I am happy to be able to state that Mr. Apte has made himself very popular with the people by his untiring zeal and kindly manners, and the attendance of the Dispensary has consequently increased.

The malarial season was this year visible.

I am respectfully of opinion that
 a Municipality cannot well be maintained at
 Mangal and on this subject I have addressed you
 in my letters noted in the margin, in the last
 of which I have suggested

No. 140 of the 19th February 1880
 No. 1402 of the 30th June 1880

that if it is deemed a sufficient object to keep
 the town clean, without under-taking any further
 improvements, the House Tax, the tax upon snuff
 and tobaccos, and the cattle round fees might
 be retained (the Octroi duty being given up),
 and that a moderate establishment costing ^{or only} ~~Rs. 528~~
in all a sum of Rupees 528 - per annum ^{to be sent} ~~Rs. 528~~
 might be kept up to secure the proper sani-

tation of the town. Six months' experience has
 shown that the collection of Octroi costs more than
 the income from that tax.

There is also a branch Muni-
 cipality at Gadquddalur under the Municipality
 of Ranabinnur, where an annual fair is held, &
 a Toll Tax is levied on visitors to provide for their
 comfort.

— VII Public Health. —

29. The extent of general conservatism in towns may be inferred from the expenditure shown in the last paragraph. The particulars of the Disbursary at Haveri, which is the only one in my district are given below:—

Taluka	Name of town.	Patients		Cost in 1879-80.			
		In	Out.	Government	Local funds	Contributions	Total.
Karajgi	Haveri	43	3935	3129-2 6	1241 3 10	.	4370-9-4.

Since my last report Assistant Surgeon, Mr. Vishnu Watal Ahe, has been placed in charge of the Disbursary. I am happy to be able to state that Mr. Ahe has made himself very popular with the people, by his untiring zeal and kind manners, and the attendance of the Dispensary has consequently increased.

The new year was this year visited

7. 1892. — Surgeon General in January last.
 It was also visited by the Collector and myself.
 For about six months, since the establishment
 of the Dispensary, it was under the supervision
 of the Karajgi Taluka Local Fund Committee,
 and from the time the Municipality at Haveri com-
 menced its work, that duty has been performed
 by the Municipal Commissioners. The visitation
 of the Dispensary has been properly carried on.

80. As far as I am able to judge
 from the duplicate weekly returns which I receive
 from the vaccinators, through the Mamledars, vac-
 cination progresses fairly throughout my charge.
 The number of children vaccinated this year is
 below:—

Ranibimmur	785.
Hangal —	879.
Kod —	968.
Karajgi —	784.
3416.	

The population and resources of
 Haveri according to the census taken in July

1879 in village Form No. 13 are given

Talukas	Human beings.			Houses.	Cattle.	Ploughs.	Carts.
	Men.	Women.	Total.				
Ranebennur	31683	29626	61309	16703	46861	7693	2464
Hangal	30152	28688	58840	12095	39742	8824	2742
Kod	37167	35004	72171	17208	69608	14110	3610
Karajgi	34824	33322	68146	17504	18683	8188	3143
Total	133826	126537	260363	63510	174792	38817	11939

The death and birth registers were tested in villages selected for the purpose, and on the whole have been fairly and carefully kept. The Commissioner's orders on this subject have been strictly attended to by me. During the year under report particular attention was paid to ascertain the accuracy of these registers as enquiries were made of the ryots when examining their receipt books regarding deaths and births in view to test the correctness of the registers above alluded to, and in a few instances in the Hangal and Karajgi talukas where the registers had not been properly

by the Deputy Surgeon General in January last. It was also visited by the Collector and myself. For about six months, since the establishment of the Dispensary, it was under the supervision of the Karajgi Taluka Local Fund Committee, but from the time the Municipality at Haveri commenced its work, that duty has been performed by the Municipal Commissioners. The visitation of the Dispensary has been regularly carried on:-

30. As far as I am able to judge from the duplicate weekly returns which I receive from the vaccinators, through the Mamisdars, vaccination progresses fairly throughout my charge. The number of children vaccinated this year is as below:-

Panabinnur	785.
Hangal —	879
Kod —	968
Karajgi —	784.
	— — 341

31. The population and resources of my charge according to the census taken in July

1879 in village Form No. 13 are given below.

Talukas	Human beings.			Houses.	Cattle.	Ploughs.	Carts.
	Men.	Women.	Total.				
Ranebennur	31683	29626	61309.	16703	46861.	7693.	2444.
Hangal	30152	28585	58737.	12095	39742.	8826	2742.
Kod	37167	35004	72171	17208	69606	14110	3610
Kurajgi	34824	33322	68146	17504	18553	8188.	3143.
Total	133826	126537	260363	63510	174792	38817.	11939.

The death and birth registers were tested in village selected for the purpose, and on the whole have been found and carefully kept. The Commissioner's orders on this subject have been strictly attended to by me during the year under report particular attention was paid to ascertain the accuracy of these registers as inquiries were made of the ryots when examining the recent crops regarding deaths and births in view to test the correctness of the registers above stated to give me a fair estimate in the Hangal and Ranebennur talukas the registers had not been made

kept up, fines were inflicted to prevent the recurrence of neglect, I consider the registers trustworthy and I am of opinion that if attention is devoted to their examination every year, nothing more will be wanted to secure accuracy and reliability in respect of these documents. Extramural burial and burning grounds have been provided in every village in these four talukas.

12. During the year under report the talukas under my charge have not suffered so severely from fever as they did last year and the death rate from the disease, as appears from the figures marginally noted, as consequently fallen very much. There was no cholera in my districts during the year under report.

Raichinur 2508.

Haukal — 1774

Kod — 2555.

Karajgi — 1621.
8458.

— VIII. Education. —

33. The number of schools in the Talukas under my charge and school houses specially erected for them are as stated in the following

table

Taluka.	Anglo-Vernacular.	Primary.	N ^o . of Government School-houses.
Ranebennur	1	23	3
Hangal	1	20	6
Kod	1	31	6
Karajji	1	28	9
Total—	2	102	22

Most of the Schools in these Talukas have been visited by me during the year under report, some of them twice, and the Book-Dépôts were also examined by me. Wherever I observed that there was a falling off in attendance I have personally spoken to the principal inhabitants of the village on the subject, to the School Committee and to the village and Taluka Officers.

Wherever necessary, cautions have been made to induce the people to contribute towards obtaining better accommodation for children.

kept up fines were inflicted to prevent the recurrence of neglect. I consider the registers trustworthy and I am of opinion that if attention is devoted to their examination every year, nothing more will be wanted to secure accuracy and reliability in respect of these documents. Extramural, burial and burning grounds have been provided in every village in these four talukas.

32. During the year under report the talukas in my charge have not suffered so severely from fever as they did last year and the death rate from these diseases as appears from the figures marginally noted, has consequently fallen very much. There was no cholera in my districts during the year under report.

District Deputy Collector

Appendix IV (kara:?)

• Exclusion of "deceit" & "disservice" made during 1899-8

[illegible]

Remarks made by
J. Colphinsten Ceyne Collector of
Wharwar on the administration
report of Mr. Anding District
Deputy Collector.

I have the honor to
submit the District Deputy
Collector's administration report for
the 4 Southern talukas of this
Collectorate,

1 The jamabandi of all
was effected before the 15th March.

2 The pension settlement
of the Kod and Mangal talukas
has caused a net increase of the
Land Revenue therein of Rs. 6829
purs; a net decrease however is
apparent in the Kambemur and
Karyaghi talukas of Rs. 8575-14-6
purs which is said by the District
Deputy

Remarks made by
J. Colphinsten Ceyne, Collector of
Wharwar on the administration
report of Mr. Anding, District
Deputy Collector.

I have the honor to
submit the District Deputy
Collector's administration report for
the 4 southern talukas of this
Collectorate.

2 The jamabandi of all
was effected before the 15th March.

2 The revision settlement
of the Kod and Mangal talukas
has caused a net increase of the
Land Revenue therein of Rs. 682
pers; a net decrease however is
apparent in the Ramhemur and
Kargyshi talukas of Rs. 8575-14-6
pers which is said by the District
Deputy,

Deputy collector) to be due to the
resignation of arable land by the
ryots subsequent to the raising of
the assessment at the revision
settlement made in the year 1878

4. The Land revenue
however is on the whole more
than the previous year by Rs.
39714-10-5; no remissions were
granted and ^{Rs. 712834-10-4} were collected out
of the demands for Land Revenue
Rs. 723866-13-4 within the year;
the remainder is or will be soon
realized. The abkaree revenue is
Rs. 4205 in excess of that of the
year before.

5. The number of rats
destroyed in the District Deputy
collector's 4 talukas or practically
speaking in two (for in Farjaghi
and Ranch Benue only, were they
numerous

numerous enough to account for
any large expenditure in their
destruction) was 1955610 for which
Rs 19529-10-4 were paid in reward
The Anding went through the above
two talukas last monsoon to urge
on all the Revenue officials, from
the Brandedars to the village
officers, the duty of encouraging the
destruction of rats.

6. One result of these
measures is thought by the
District Deputy Collector to be the
disappearance of all signs of the
great distress among the poor which
followed the famine and was slow
to disappear. In my tour over
the southern talukas during the
last season less distress than
formerly was certainly perceptible
but there were a few isolated
instances

Deputy collector to be due to the
reignation of arable land by the
rights subsequent to the raising of
the assessment at the revision
settlement made in the year 1879

4 The Land revenue is
however is on the whole more
than the previous year by Rs.
39714-10-5; no remissions were
granted and ^{Rs 712834-10-4} were collected out
of the demands for Land Revenue
Rs 723866-13-4 within the year,
the remainder is or will be soon
realized. The abkaree revenue is
Rs 4205 in excess of that of the
year before.

5 The number of rats
destroyed in the District Deputy
collector's 4 talukas or practically
speaking in two (for in Kargaghi
and Ranch Benue only, were they
numerous

any large expenditure in their
destruction) was Rs 19586 for which
Rs 19529 12-4 were paid in revenue
Mts. and we went through the above
two talukas last monsoon to urge
on all the Revenue officials, from
the brambledars to the village
officers, the duty of encouraging the
destruction of rats

6 One result of these
measures is thought by the
District Deputy Collector to be the
disappearance of all signs of the
great distress among the poor which
followed the famine and was slow
to disappear. In my tour in
the southern talukas during the
past season less distress than
formerly was certainly perceptible
but there were a few isolated
instances

metastases of the results of the famine
in persons whose blood had been
poisoned by improper & insufficient
food so that their limbs were
attacked by sloughing ulcers which
eat through the bones were no
steps taken to stop them. These
ulcers were obstinate and slow to
heal but the charitable dispensary
at Haveri did good in curing some
such cases which would never
have got well without it. No doubt
the rewards paid to destroy rats
did good by relieving the wants
of the laboring poor and this not
only prevented much sickness which
is often brought on by want and
insufficient food but it had also
a distinct effect in decreasing the
temptations to crime. Waddars the
huf rat killers are also, I regret to

Ray

though excellent labourers the
public works also very often being
and shoddy iron beaters these
usual tools the pick dig iron pick
or cracker are very handy for
digging through mud walls which
most native houses are composed
of. The last rainy and four season
however they earned such large
wages by the legitimate rewards
given by the state that temptation
to crime was removed.

The District Deputy
Collector notices that much cultivated
land has been thrown up since
the revision settlement in his
talukas. It is horrible that before
that took place many ryots held
more land than they could profitably
bring under cultivation. The return
of these talukas to prosperity will

instances of the results of the famine
in persons whose blood had been
poisoned by improper & insufficient
food so that their limbs were
attacked by sloughing ulcers which
eat through the bones were no
steps taken to stop them. These
ulcers were obstinate and slow to
heal but the charitable dispensary
at Haveri did good in curing some
such cases which would never
have got well without it. No doubt
the rewards paid to destroy rats
did good by relieving the wants
of the laboring poor and this not
only prevented much sickness which
is often brought on by want and
insufficient food but it had also
a distinct effect in decreasing the
temptations to crime. Waddars the
chief rat killers are also, I regret to

Ray

say, though excellent labourers at
public works, also very often thieves
and skilful house-breakers. Their
usual tools the pick and iron pick
or crowbar are very handy for
digging through mud walls which
most native houses are composed
of. The last rainy and fair season
however they earned such large
wages by the legitimate rewards
given by the state that temptation
to crime was removed.

The District Deputy
Collector notices that much cultivated
land has been thrown up since
the revision settlement in his
Talukas. It is probable that before
that took place many ryots held
more land than they could profitably
bring under cultivation. The return
of these Talukas to prosperity will

be shown as population increased sufficiently to bring this land back again into cultivation.

8. The District Deputy Collector appears to have carried out the orders of Government regarding the destruction of useless records and examination of village accounts and records in a satisfactory manner.

9. Licence Tax - This seems to have worked more satisfactorily during the year under report only 40 persons having presented themselves for the hearing of their appeals and only 74 appeals having been made in the first instance. The irrecoverable items here due from persons who had absconded and gone either to Independent territory or where their whereabouts

characteristic of the not having been
no efforts taken to improve the same.

Para 20. - Collieries and

even when money was not
spent from Local Funds in the
District Deputy Collector Talukas
in improving the water that the
God, Ranch Bannur and Mangal
Talukas are fairly well off for
water. The great want in these
southern Talukas is for good roads
much has been done to supply the
but much still remains to be
done. Only the less important
works were entrusted to the Local
Fund Committees, this accounts
for so little appearing in the accounts
table under this para.

Para 21. - It will be
seen from what the District
Deputy Collector here states that a
good

be shown as population increases sufficiently to bring this land back again into cultivation

8. The District Deputy collector appears to have carried out the orders of Government regarding the destruction of useless records and examination of village accounts and records in a satisfactory manner

9. Licence tax - This seems to have worked more satisfactorily during the year under report only 40 persons having presented themselves for the hearing of their appeals and only 74 appeals having been made in the first instance. The unrecoverable items here due from persons who had absconded and gone either to Independent territory or where their whereabouts

whereabouts are not known but
no efforts behind them

Para 23. Public works - It
seems why more money was not
spent from Local Funds in the
district Deputy Collector talukas
in improving the water that the
God, Ranch Benu and Mangal
talukas are fairly well off for
water. The great want in these
southern talukas is for good roads
much has been done to supply this
but much still remains to be
done. Only the less important
works were entrusted to the Local
Fund committees, this accounts
for so little appearing in the second
table under this para

Para 25 - It will be
seen from what the District
Deputy Collector here states that a
good

good beginning is being made to
continue road side tree plantation
as in former years.

Para 27. In reference to
what Mr. Anding has here stated
about the need for the construction
of a charitable dispensary at Sangamner
the estimate for constructing one
similar to an excellent one which
the Surgeon General told me of
at Sangamner in the Ahmadnagar
Zilla the plan of which was sent to
me by the collector of that Zilla is
being made by the Executive Engineer
and will soon be ready. He tells
me it will cost Rs 8000. This will
be a model of what a charitable
dispensary should be and will
be of immense benefit to the
southern portion of the Zilla. &
Consequently the expenditure of Rs.
3000

are and be funded
from Local funds to supplement
the popular contributions of 5553-5
annas to construct it.

Para 25. The municipalities
of Byadgi, Hawree and Mangal
were only established this year and
it is clear from the figures given
in the tables of income & expenditure
by the District Deputy Collector that
the Mangal Municipality with a
total income of Rs. 382-5-9 from
all sources had better be given up
or at any rate all town duties therein
abolished as they cause great
inconvenience to the villagers and
realize only Rs. 163--3 pice. The
suggestion of the District Deputy
Collector given in his 28th para and
in his former letters of the 19th
February and 3rd of June might be
adopted

good alignment is being made to
continuously road use the same
as in former years.

Para 27. In reference to
what Mr. Anding has here stated
about the need for the construction
of a charitable dispensary at Sangamner
the estimate for constructing one
similar to an excellent one which
the Surgeon General told me of
at Sangamner in the Ahmednagar
Zilla, the plan of which was sent to
me by the Collector of that Zilla is
being made by the Executive Engineer
and will soon be ready. He tells
me it will cost Rs 8000. This will
be a model of what a charitable
dispensary should be and will
be of immense benefit to the
southern portion of the Zilla. &
incidentally the expenditure of Rs

from local funds to supplement
the popular contribution of 500-5
annas to construct it.

Para 25. The municipalities
of Byadgi, Hanaree and Mangal
were only established this year &
it is clear from the figures given
in the tables of income & expenditure
by the District Deputy Collector that
the Mangal municipality with a
total income of Rs. 382-5-9 from
all sources had better be given up
or at any rate all tax duties thereon
abolished as they cause great
inconvenience to the villagers and
realize only Rs. 163-...-3 pice. The
suggestion of the District Deputy
Collector given in his 25th para and
in his former letters of the 19th
February and 3rd of June might be
adopted

adopted with advantage only to
keep up a staff of scavengers to
clean the town by taxing houses,
snuff and tobacco and by the
cattle pound receipts which could be
given up by the Local Funds for
this object.

Para 29. The efficiency
of the conservancy can scarcely
as the District Deputy Collector
would here imply be judged of from
the figures given in the table of
municipal expenditure because
Haveri for instance is a large
village, with many streets covering
a much wider area than Ryasree
consequently the conservancy of the
latter is likely to be twice as efficient
done for Rs. 288 as that of Haveri
for Rs. 242. So much depends
upon situation and the degree of
inspection

inspection both over the scavengers
and the town people themselves.
At Haveri there is much petty
fear (which gives cover to committing
of murders) on the outskirts of the
village, the people of which are also
notoriously dirty in their habits and
of a more wirily disposition than the
traders at Byadgi. As Byadgi is 9
miles from Ranch Benhur & Haveri
6 miles from Garjaghi the Mamedar
cannot keep that daily supervision
of the sanitary establishment which
is so much needed consequently
these duties will devolve upon the
Municipal Commissioners. I have seen
so little of these towns since the
establishment of the Municipality
that I am unable to state with precision
how far they attend to these matters.
It will probably be difficult to

adopted with advantage viz. to
keep up a staff of scavengers to
clean the town by taxing houses
snuff and tobacco and by the
cattle pound receipts which could be
given up by the Local Funds for
this object.

Para 29. The efficiency
of the conservancy can scarcely
(as the District Deputy Collector
would here imply) be judged of from
the figures given in the table of
Municipal expenditure because as
Dameri for instance is a large
village with many streets covering
a much wider area than Burdighi
consequently the conservancy of the
latter is likely to be done as efficiently
done for Rs 255 as that of Dameri
for Rs 242. So much depends
upon situation and the degree of
inspection

reflection both over the leavages
and the towns people themselves
At Haver there is much pick-
pocketing (which gives cover to committed
murders) on the out skirts of the
stage the people of which are also
notoriously dirty in their habits and
a more unmanly disposition than
found at Ryadgi. As Ryadgi is
12 miles from Ranch Benner & Haver
12 miles from Garasgi the Mamedas
must keep that daily supervision
with the sanitary establishment where
it is needed consequently
the police are not resolved upon the
establishment of a police I have seen
nothing of their kind as is the
case with the other towns of the country
that I am prepared to state with the greatest
confidence the friend to these countries

induce them to take much trouble
in the matter, in fact ~~from~~
from a past experience of the
necessity for having resident Magistrate
to prevent nuisances I would be
glad if Government could invest
the Sub-judge of Haverce, with the
powers of a second class Magistrate
as I am convinced it would have
a good effect in improving the
sanitary condition of the town as well
as in keeping in order the quarrelsome
and riotous inhabitants of that
town.

Para 31. It appears that
proper measures are now being
taken to test the birth and death
registers and that due notice has
been taken of mistakes by former
the village officers where the
registers had not been kept properly.
Para

Para 33. It is satisfactory to learn from the District Deputy Collector's remarks on the mortality from fever that in the year under report it has decreased since last year. It still appears to be excessive high especially in the God and Rane Bemus talukas. It is likely that the establishment of the ~~charitable~~ dispensary at Haueri will have a good effect in still further diminishing it but as I have already expressed an opinion in another report lately these deaths from fever are reported by the village officers who frequently attribute deaths from other causes to fever simply from ignorance. Quinine has been supplied to all the Mamledar's Offices for sale but no efficiency

induce them to take much trouble
in the matter, in fact ~~~~~
from a fact experience, of the
necessity for having resident Magistrates
to prevent nuisances it would be
glad if Government could invest
the Sub judge of Haverce with the
powers of a second class Magistrate
as I am convinced it would have
a good effect in improving the
sanitary condition of the town as well
as in keeping under the quarrelsome
and riotous inhabitants of that
town.

Q. 31. It appears that
proper measures are now being
taken to keep the birth and death
registers and that due notice has
been taken of mistakes by the
village officers where the
registers had not been kept before

Para 32. It is satisfactory
to learn from the District Deputy
Collector's remarks on the mortality
from fever that in the year under
report it has decreased since last
year. It still appears to be excessively
high especially in the God and
Rane Benne, Lalukao. It is
likely that the establishment of
the ~~Charitable~~ dispensary at
Hauori will have a good effect
in still further diminishing it
but as I have already expressed
an opinion in another report
lately these deaths from fever are
reported by the village officers
who frequently attribute deaths from
other causes to fever simply from
~~ignorance~~ ignorance. Rumour has been
published that the Government
is about to establish a dispensary

nduce them to take much trouble
in the matter, in fact ~~as~~
from ~~a~~ past experience, of the
necessity for having resident Magistrates
to prevent nuisances I would be
glad if Government could invest
the Sub judge of Haverue, with the
powers of a second class Magistrate
as I am convinced it would have
a good effect in improving the
sanitary condition of the town as well
as in keeping under the quarrelsome
and riotous inhabitants of that
town.

Para 31. It appears that
proper measures are now being
taken to get the birth and death
registers and that due notice has
been taken of mistakes by the
village officers where the
registers had not been kept before

90
Para 32. It is satisfactory
to learn from the District Deputy
Collector's remarks on the mortality
from fever that in the year under
report it has decreased since last
year. It still appears to be excessive
high especially in the God and
Rane Benim, Lalukao. It is
likely that the establishment of
the ~~charitable~~ dispensary at
Havre will have a good effect
in still further diminishing it
but as I have already expressed
an opinion in another report re-
lating these deaths from fever as
reported by the village officers
who frequently attribute to deaths from
other causes to fever simply from
~~misapprehension~~ ^{ignorance} Benim has been
subscribed to all the Grants and it
is to be hoped that the efficiency

not as great as it should be
owing to ignorance of how it ought
to be administered. This might
be prevented and real good effected
if besides the genuine powders &
small packets of fever medicine
such as aperients and diaphoretics
were allowed to be sold in the
Mamledars' offices ~~together~~ with
a short memorandum in the
vernacular of the district describing
the proper method of treating
patients in each stage of fever,
people would then be able to treat
themselves in villages far distant
from the charitable dispensary.

Para 33. Education is
progressing but it is evident from
a comparison of the table of population
in para 31 with the numbers of
~~schools~~ in this para that much
still

still remains to be done. The more
if the people are agriculturists who
employ their sons in the fields
or to herd cattle so that it is -
often difficult to induce sufficient
number of parents to send their
sons to school and the attendance
is always liable to become irregular
at harvest or such other times as
require every hand which can be
obtained to be employed in the
fields.

Para 34. The progress
made in the watan inquiries in
the District Deputy Collector's 4
Talukas can be better judged of
from the following table showing
the number of watans to be in-
quired into at the beginning of
the year under report, the number
of watan cases in which inquiries
were

is not so great as it should be
owing to ignorance of how it ought
to be administered. This might
be prevented and real good effected
if besides the quinine powders in
small packets of fever medicine
such as aperients and diaphoretic
were allowed to be sold in the
Mamledars' offices ~~together~~ with
a short memorandum in the
vernacular of the district describing
the proper method of treating
patients in each stage of fever,
people would then be able to treat
themselves in villages far distant
from the charitable dispensary.

Para 33. Education is
progressing but it is evident from
a comparison of the ~~table~~ **table of population**
in para 31 with the numbers of
~~schools~~ in this para that much

still remains to be done. The mass
of the people are agriculturists who
employ their sons in the fields,
or to herd cattle so that it is -
often difficult to induce sufficient
number of parents to send their
sons to school and the attendance
is always liable to become irregular
at harvest or such other times as
require every hand which can be
obtained to be employed in the
fields.

Para 34 The progress
made in the watan inquiries in
the District Deputy Collector's 4
Talukas can be better judged of
from the following table showing
the number of watans to be
inquired into at the beginning of
the year under report, the number
of watan coers in which inquiries

is not so great as it should be
owing to ignorance of how to treat,
to be administered. This might
be prevented and real good effected
if besides the quinine, powder, &
small packets of fever medicine,
such as aperients and diaphoretics
were allowed to be sold in the
Mauldars' officers ~~together~~ with
a short memorandum in the
vernacular of the district describing
the proper method of treating
patients in each stage of fever,
people would then be able to treat
themselves in all cases far better
from the charitable dispensary.

Para 33. Education is
progressing but it is evident from
a comparison of the ~~table of population~~
in para 31 with the number of
~~schools~~ in this para that much

still remains to be done. The mass
of the people are agriculturists who
employ their sons in the fields
or to herd cattle so that it is
often difficult to induce sufficient
numbers of parents to send their
sons to school and the attendance
is always liable to become irregular
at harvest or such other times as
require every hand which can be
obtained to be employed in the
fields.

(2) Para 34. The progress
made in the water inquiries in
the Westland. Rep. by Collector & Co.
Collector can be better judged of
from the following table showing
the number of Waters to be
improved at the beginning of
the year 1884 & the number
of Waters improved which remained

were made and the balances
still uninquied into more should
have been done in the Mangal taluka

Talukas	No. of watans disinquied into at the begining of the year		No. of watans inquied into		No. of watans to be inquied at the close of the year	
	Patels	Kul- Karnis	Patels	Kul- Karnis	Patels	Kul- Karnis
Rani Bimra	64	38	7	9	57	29
Mangal	69	62	1	1	68	61
Kodh	106	71	18	23	88	48
Kargachi	47	42	14	27	33	15

apparently, where are still many cases
to be decided. There has been
however a considerable improvement
over the work done last year when
only 40 cases were disposed of
